

Where do we go now?

Use and availability of
anthropometric data.

Sandy Ressler 6/24/97 Systems Anthropometry Workshop
NIST

NIST Mission/Role

- We're here to help industry - REALLY!!
- Provide a testing infrastructure.

Goal

- State the desired goal
- Use multiple points if necessary

Objective

- State the desired objective
- Use multiple points if necessary

Today's Situation

- Data is difficult to use.
- Linear anthropometry measurements inadequate for 3D models.

How Did We Get Here?

- Any relevant historical information
- Original assumptions that are no longer valid

Available Options

- State the alternative strategies
- List advantages & disadvantages of each
- State cost of each option
- Use multiple slides if necessary

Recommendation

- Recommend one or more of the strategies

Action Items

- On-line version of workshop for archival purposes.
- Repository of VRML children.
